EDUCATION

Meerut Institute of Engineering and Technology (MIET)

2023 – Present

B.Tech in Computer Science and Information Technology — Meerut, UP

EXPERIENCE

Full Stack Developer Intern — Saral Tech (Remote)

May 2026 – Present

- Designed and built a vendor registration system with secure JWT-based authentication, enabling seamless onboarding and profile management for vendors and caterers on the platform.
- Developed a complete booking and management module handling end-to-end booking flows, availability tracking, and coordination between clients and service providers.
- Built a full-featured admin panel providing the founding team with centralized control over users, vendors, bookings, and platform content; integrated Cloudflare for DNS, security, and performance optimization using the MERN stack.

PROJECTS

ContractGuard — AI Contract Analysis System | Python, FastAPI, LangChain, FAISS,

Mar 2026

Gemini API

- Built a full-stack AI system that analyzes legal contracts — generates plain-language summaries, detects risky clauses (penalties, liability, non-compete, auto-renewal), and computes a Contract Risk Score (0–100) to help users evaluate legal exposure instantly.
- Implemented RAG-based interactive Q&A over uploaded contracts (PDF/DOCX) using FAISS vector store and Gemini API, delivering accurate, context-grounded answers from within the document.
- Developed a contract comparison feature to highlight better/worse terms across two contracts; exposed all functionality via clean FastAPI endpoints and deployed the full stack on Vercel.

AgriSense — AI Agricultural Platform | MERN, Socket.io, Hugging Face, Gemini Flash

Sep – Oct 2025

- Built a full-stack agricultural intelligence platform offering crop recommendations, hyperlocal weather insights, and AI-powered guidance to farmers using Gemini Flash and Hugging Face APIs.
- Achieved 95% accuracy on plant disease detection using Hugging Face models; integrated a real-time multilingual AI chat supporting Malayalam and English for broader rural accessibility.
- Designed a live monitoring dashboard for agricultural officers to track farm data in real time, powered by Socket.io for live updates and deployed on Vercel.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript
Frameworks & Libraries:	MERN Stack (MongoDB, Express, React, Node.js), LangChain, Socket.io
AI/ML:	Hugging Face, Gemini API, RAG Pipelines, AI Agents
Tools & Platforms:	Git, GitHub, UiPath (RPA), Vercel, Cloudflare, AWS
Databases:	MySQL, MongoDB
Other:	REST APIs, JWT Authentication, Responsive Web Design, DSA

CERTIFICATIONS

AWS Certified Cloud Practitioner

Jul 2026

AWS Certified AI Practitioner

Jul 2026

Professional Automation Developer Associate — UiPath

Nov 2025

Building AI Agents with MongoDB — MongoDB

Mar 2025
